Notch Signalling: 92 (Current Topics in Developmental Biology)

Notch Signalling: 92 (Current Topics in Developmental Biology)

Notch signaling is an evolutionarily conserved pathway in multicellular organisms that regulates cell-fate determination during development and in stem cells. This volume, which is part of the Current Topics in Developmental Biology series, covers topics such as Notch signaling in cardiac development and disease and Notch in stem cells. International authors provide researchers with an overview and synthesis of the latest research findings and contemporary thought in the area.
