Lasers and Holography (Dover Books Explaining Science)

Winston E. Kock

Lasers and Holography (Dover Books Explaining Science) Winston E. Kock

As the words *holo* (complete) and *gram* (message) connote, the hologram captures the entire message of a scene in all its visual properties, including the realism of three dimensions. It involves the simple process of photographically recording the pattern formed by two interfering sets of light waves, one of these sets being a reference wave. With the introduction of lasers to holography in 1963, real advances in the development of holography began to take place.

Dr. Kock's lucid introduction to lasers and holography has now been revised and updated for a second edition. It begins with a clear discussion of wave patterns and coherence. Then the development of lasers is summarized, along with the phenomenon of wave diffraction. Finally, the important subjects of zone plates and the properties of holograms are skillfully described. A new, concluding chapter brings the story up to the present, with a survey of recent advances in such areas as viewing holograms, hologram computer memories, liquid surface holography, synthetic-aperture radar and sonar, large new lasers, fiber optics, etc.

Using language that can be readily understood by high school and junior high school students, Dr. Kock has written a brief, yet authoritative volume that should satisfy anyone's curiosity about this burgeoning field.

The remarkable discoveries that have already occurred are only a prelude to an even more remarkable future. 84 illustrations, including 8 new to this edition. New preface. Suggested (1981) additional reading. Index.

From reader reviews:

James Snyder:

This Lasers and Holography (Dover Books Explaining Science) usually are reliable for you who want to be described as a successful person, why. The explanation of this Lasers and Holography (Dover Books Explaining Science) can be one of many great books you must have will be giving you more than just simple examining food but feed a person with information that perhaps will shock your preceding knowledge. This book is handy, you can bring it everywhere and whenever your conditions at e-book and printed ones. Beside that this Lasers and Holography (Dover Books Explaining Science) giving you an enormous of experience such as rich vocabulary, giving you tryout of critical thinking that we know it useful in your day action. So , let's have it appreciate reading.

John Ashcraft:

The particular book Lasers and Holography (Dover Books Explaining Science) will bring that you the new experience of reading a book. The author style to spell out the idea is very unique. When you try to find new book to see, this book very suitable to you. The book Lasers and Holography (Dover Books Explaining Science) is much recommended to you to learn. You can also get the e-book from the official web site, so you can quickly to read the book.

Isabel Martin:

Reading can called thoughts hangout, why? Because while you are reading a book specifically book entitled Lasers and Holography (Dover Books Explaining Science) your mind will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely can become your mind friends. Imaging every single word written in a book then become one contact form conclusion and explanation that will maybe you never get just before. The Lasers and Holography (Dover Books Explaining Science) giving you a different experience more than blown away your head but also giving you useful info for your better life with this era. So now let us present to you the relaxing pattern at this point is your body and mind will be pleased when you are finished looking at it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

Lauren Miner:

A number of people said that they feel uninterested when they reading a reserve. They are directly felt that when they get a half areas of the book. You can choose the particular book Lasers and Holography (Dover Books Explaining Science) to make your own reading is interesting. Your own skill of reading ability is developing when you such as reading. Try to choose straightforward book to make you enjoy to read it and mingle the sensation about book and reading through especially. It is to be very first opinion for you to like to open up a book and go through it. Beside that the e-book Lasers and Holography (Dover Books Explaining Science) can to be your friend when you're feel alone and confuse with the information must

you're doing of that time.
