Bayesian Networks in R: 48 (Use R!)

Radhakrishnan Nagarajan, Marco Scutari, Sophie Lèbre

Bayesian Networks in R: 48 (Use R!) Radhakrishnan Nagarajan, Marco Scutari, Sophie Lèbre
Bayesian Networks in R with Applications in Systems Biology is unique as it introduces the reader to the essential concepts in Bayesian network modeling and inference in conjunction with examples in the open-source statistical environment R. The level of sophistication is also gradually increased across the chapters with exercises and solutions for enhanced understanding for hands-on experimentation of the theory and concepts. The application focuses on systems biology with emphasis on modeling pathways and signaling mechanisms from high-throughput molecular data. Bayesian networks have proven to be especially useful abstractions in this regard. Their usefulness is especially exemplified by their ability to discover new associations in addition to validating known ones across the molecules of interest. It is also expected that the prevalence of publicly available high-throughput biological data sets may encourage the audience to explore investigating novel paradigms using the approaches presented in the book.

From reader reviews:

Adam Jones:

Information is provisions for people to get better life, information currently can get by anyone from everywhere. The information can be a information or any news even restricted. What people must be consider when those information which is inside the former life are difficult to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you find the unstable resource then you have it as your main information it will have huge disadvantage for you. All of those possibilities will not happen within you if you take Bayesian Networks in R: 48 (Use R!) as your daily resource information.

Larry Boggs:

Reading a publication can be one of a lot of activity that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a publication will give you a lot of new info. When you read a e-book you will get new information simply because book is one of numerous ways to share the information or their idea. Second, studying a book will make you actually more imaginative. When you studying a book especially fictional works book the author will bring you to imagine the story how the figures do it anything. Third, you may share your knowledge to some others. When you read this Bayesian Networks in R: 48 (Use R!), you are able to tells your family, friends along with soon about yours book. Your knowledge can inspire average, make them reading a publication.

Cheree Rodriquez:

Reading a e-book tends to be new life style in this era globalization. With looking at you can get a lot of information that could give you benefit in your life. Having book everyone in this world can easily share their idea. Guides can also inspire a lot of people. A lot of author can inspire their particular reader with their story or perhaps their experience. Not only the storyline that share in the publications. But also they write about advantage about something that you need example of this. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors these days always try to improve their talent in writing, they also doing some exploration before they write for their book. One of them is this Bayesian Networks in R: 48 (Use R!).

Charles Morris:

The particular book Bayesian Networks in R: 48 (Use R!) has a lot info on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. The writer makes some research prior to write this book. This particular book very easy to read you can find the point easily after reading this book.
