Open Source Software in Life Science Research: Practical Solutions to Common Challenges in the Pharmaceutical Industry and Beyond (Woodhead Publishing Series in Biomedicine)

The free/open source approach has grown from a minor activity to become a significant producer of robust, task-orientated software for a wide variety of situations and applications. To life science informatics groups, these systems present an appealing proposition - high quality software at a very attractive price. Open source software in life science research considers how industry and applied research groups have embraced these resources, discussing practical implementations that address real-world business problems.

The book is divided into four parts. Part one looks at laboratory data management and chemical informatics, covering software such as Bioclipse, OpenTox, ImageJ and KNIME. In part two, the focus turns to genomics and bioinformatics tools, with chapters examining GenomicsTools and EBI Atlas software, as well as the practicalities of setting up an 'omics' platform and managing large volumes of data. Chapters in part three examine information and knowledge management, covering a range of topics including software for web-based collaboration, open source search and visualisation technologies for scientific business applications, and specific software such as DesignTracker and Utopia Documents. Part four looks at semantic technologies such as Semantic MediaWiki, TripleMap and Chem2Bio2RDF, before part five examines clinical analytics, and validation and regulatory compliance of free/open source software. Finally, the book concludes by looking at future perspectives and the economics and free/open source software in industry.

- Discusses a broad range of applications from a variety of sectors
- Provides a unique perspective on work normally performed behind closed doors
- Highlights the criteria used to compare and assess different approaches to solving problems

From reader reviews:

Lydia Sanders:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to understand everything in the world. Each guide has different aim or maybe goal; it means that publication has different type. Some people really feel enjoy to spend their a chance to read a book. They may be reading whatever they get because their hobby will be reading a book. What about the person who don't like examining a book? Sometime, individual feel need book after they found difficult problem or maybe exercise. Well, probably you should have this Open Source Software in Life Science Research: Practical Solutions to Common Challenges in the Pharmaceutical Industry and Beyond (Woodhead Publishing Series in Biomedicine).

Jennifer Bryan:

Have you spare time for any day? What do you do when you have considerably more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their own spare time to take a walk, shopping, or went to often the Mall. How about open or read a book allowed Open Source Software in Life Science Research: Practical Solutions to Common Challenges in the Pharmaceutical Industry and Beyond (Woodhead Publishing Series in Biomedicine)? Maybe it is to become best activity for you. You already know beside you can spend your time together with your favorite's book, you can better than before. Do you agree with it has the opinion or you have different opinion?

Gaye Lewis:

Is it you who having spare time and then spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Open Source Software in Life Science Research: Practical Solutions to Common Challenges in the Pharmaceutical Industry and Beyond (Woodhead Publishing Series in Biomedicine) can be the answer, oh how comes? It's a book you know. You are thus out of date, spending your spare time by reading in this brand-new era is common not a nerd activity. So what these publications have than the others?

Marianne Stomain:

That reserve can make you to feel relax. This book Open Source Software in Life Science Research: Practical Solutions to Common Challenges in the Pharmaceutical Industry and Beyond (Woodhead Publishing Series in Biomedicine) was bright colored and of course has pictures around. As we know that book Open Source Software in Life Science Research: Practical Solutions to Common Challenges in the Pharmaceutical Industry and Beyond (Woodhead Publishing Series in Biomedicine) has many kinds or type. Start from kids until teens. For example Naruto or Private eye Conan you can read and feel that you are the character on there. So , not at all of book are usually make you bored, any it offers up you feel happy, fun

and loosen up. Try to choose the best book for yourself and try to like reading in which.
