Multimedia Cartography

Multimedia Cartography

The explosive development of interactive multimedia products on CD-ROM and the Internet, via the WWW, has generated immense interest in this field. The approach to producing interactive multimedia mapping products is quite unique and there has been an upsurge of interest in developing methodologies that best exploit both the technology and communication effectiveness of multimedia mapping. This book is addressed to professional cartographers interested in moving into multimedia mapping, for cartographers already involved in this field who wish to discover the approaches that other practitioners in multimedia cartography have already taken and for students and academics in the mapping sciences and related geographic fields wishing to update their knowledge of cartographic design and production.
