## Facets Of Buddhism Iida

"Facets of Buddhism" is a collection of essays written by one of the pre-eminent Japanese scholars in the fields of Buddhism and comparative religion. The ten essays are loosely linked together by the common themes of dependent co-origination (pratitya-samutpada); of the effect of Madhyamika and Yogacara ideas on Japanese literature and culture; and of the tensions and harmonies amongst different religious traditions and different Buddhist sects. The work provides access to a wide range of Japanese scholarly exchange and opinion, much of which has until now been available only in Japanese; offers a presentation of the different Chinese, Tibetan, and Japanese interpretations of important passages from classical Indian Buddhist texts; and gives a comparison of meditation techniques described by Indian, Chinese and Tibetan writers. Drawing on his experiences during a long and distinguished career as a teacher and scholar, Professor Iida provides insights into the place of women and the feminine principle in Buddhism, the convergence of folk beliefs and philosophical Buddhism in Japan, the rise of the modern Japanese Buddhist sects and, through a comparison of Buddhist, Christian and Sufi-Yogic practices and modern psychology, the difference, similarities and interdependence of the different faiths of humankind.
