This innovative book marks a significant departure from tradition analyses of the evolution of cultural landscapes and the interpretation of past environments. *Maps of Meaning* proposes a new agenda for cultural geography, one set squarely in the context of contemporary social and cultural theory.

Notions of place and space are explored through the study of elite and popular cultures, gender and sexuality, race, language and ideology. Questioning the ways in which we invest the world with meaning, the book is an introduction to both culture's geographies and the geography of culture.
