Post-Parametric Automation in Design and Construction

Alfredo Andia, Thomas Spiegelhalter

Post-Parametric Automation in Design and Construction Alfredo Andia, Thomas Spiegelhalter
Automation, a mixture of algorithms, robots, software, and avatars, is transforming all types of jobs and industries. This book responds to one critical question for the design and construction industry: “how are architects, engineers, and contractors using information technology to further automate their practices?”

Addressing the use of new digital technologies, particularly parametric automation for design and construction in the building industry, this book looks at how technologically advanced architectural and engineering practices are semi-automating their design processes by using sophisticated algorithms to transform their workflows. The book also documents a set of firms that are further advancing automation by using pre-fabrication, modularization, and custom designs via robotics.

From reader reviews:

Joaquin Hogan:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to understand everything in the world. Each publication has different aim as well as goal; it means that guide has different type. Some people really feel enjoy to spend their a chance to read a book. They may be reading whatever they take because their hobby will be reading a book. Why not the person who don't like looking at a book? Sometime, particular person feel need book once they found difficult problem as well as exercise. Well, probably you will require this Post-Parametric Automation in Design and Construction.

Andrew Hall:

What do you about book? It is not important to you? Or just adding material when you require something to explain what your own problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make you feel bored faster. And you have time? What did you do? All people has many questions above. They need to answer that question due to the fact just their can do this. It said that about reserve. Book is familiar on every person. Yes, it is right. Because start from on kindergarten until university need this specific Post-Parametric Automation in Design and Construction to read.

Rose Bennett:

Reading a book can be one of a lot of pastime that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people love it. First reading a book will give you a lot of new information. When you read a reserve you will get new information simply because book is one of numerous ways to share the information or even their idea. Second, looking at a book will make you more imaginative. When you looking at a book especially fictional works book the author will bring you to definitely imagine the story how the character types do it anything. Third, it is possible to share your knowledge to some others. When you read this Post-Parametric Automation in Design and Construction, you can tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a e-book.

Jeff Brown:

Reading a book for being new life style in this year; every people loves to go through a book. When you examine a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. If you would like get information about your analysis, you can read education books, but if you want to entertain yourself look for a fiction books, these us novel, comics, along with soon. The Post-Parametric Automation in Design and Construction will give you new experience in looking at a book.
