**W.A.E. McBryde**

A Critical Review of Equilibrium Data for Proton- and Metal Complexes of 1,10-Phenanthroline, 2,2'-Bipyridyl and Related Compounds is a compilation of acidity constants for the 1,10-phenanthrolinium and 2,2'-bipyridinium ions and their derivatives, as well as stability constants for metal complexes formed by the conjugate bases of these. These equilibrium data are critically examined.

This monograph includes values determined in non-aqueous or mixed solvents, as well as those for a large number of ""mixed"" metal complexes incorporating these bases and a second ligand. The survey also contains known values for the enthalpies and entropies of formation for the proton- and metal-ion complexes. The compilation indicates the conditions under which the equilibrium constants apply and the methods by which they were determined. The acid-base properties of the compounds are represented by the acidity constant of the phenanthrolinium or bipyridinium ion expressed as a pK value. Nearly all the values listed were obtained either potentiometrically or spectrophotometrically, both of which depend fundamentally on measurements of pH or hydrogen-ion concentration.

This book will be of value to chemists.

**From reader reviews:**

**Margarito Rone:**

Book is to be different for every single grade. Book for children until adult are different content. As you may know that book is very important normally. The book A Critical Review of Equilibrium Data for Proton- and Metal Complexes of 1,10-Phenanthroline, 2,2'-Bipyridyl and Related Compounds: Critical Evaluation ... Metal Complexes Pt. A (IUPAC Publications) was making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The book A Critical Review of Equilibrium Data for Proton- and Metal Complexes of 1,10-Phenanthroline, 2,2'-Bipyridyl and Related Compounds: Critical Evaluation ... Metal Complexes Pt. A (IUPAC Publications) is not only giving you more new information but also to get your friend when you truly feel bored. You can spend your own personal spend time to read your book. Try to make relationship with all the book A Critical Review of Equilibrium Data for Proton- and Metal Complexes of 1,10-Phenanthroline, 2,2'-Bipyridyl and Related Compounds: Critical Evaluation ... Metal Complexes Pt. A (IUPAC Publications). You never experience lose out for everything when you read some books.

**Jackie Peters:**

As people who live in often the modest era should be up-date about what going on or facts even knowledge to make these individuals keep up with the era which is always change and move forward. Some of you maybe can update themselves by reading through books. It is a good choice for you personally but the problems coming to you actually is you don't know what one you should start with. This A Critical Review of Equilibrium Data for Proton- and Metal Complexes of 1,10-Phenanthroline, 2,2'-Bipyridyl and Related Compounds: Critical Evaluation ... Metal Complexes Pt. A (IUPAC Publications) is our recommendation to help you keep up with the world. Why, because book serves what you want and need in this era.

**Joan Freeman:**

Nowadays reading books become more and more than want or need but also turn into a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge even the information inside the book this improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want have more knowledge just go with training books but if you want feel happy read one with theme for entertaining such as comic or novel. The particular A Critical Review of Equilibrium Data for Proton- and Metal Complexes of 1,10-Phenanthroline, 2,2'-Bipyridyl and Related Compounds: Critical Evaluation ... Metal Complexes Pt. A (IUPAC Publications) is kind of guide which is giving the reader unpredictable experience.

**Alicia Romero:**

Are you kind of active person, only have 10 or 15 minute in your morning to upgrading your mind ability or

thinking skill also analytical thinking? Then you are having problem with the book when compared with can satisfy your short space of time to read it because pretty much everything time you only find publication that need more time to be learn. **A Critical Review of Equilibrium Data for Proton- and Metal Complexes of 1,10-Phenanthroline, 2,2'-Bipyridyl and Related Compounds: Critical Evaluation ... Metal Complexes Pt. A (IUPAC Publications)** can be your answer since it can be read by you who have those short free time problems.
