Agent_Zero: Toward Neurocognitive Foundations for Generative Social Science (Princeton Studies in Complexity) Joshua M. Epstein

The Final Volume of the Groundbreaking Trilogy on Agent-Based Modeling

In this pioneering synthesis, Joshua Epstein introduces a new theoretical entity: *Agent_Zero*. This software individual, or "agent," is endowed with distinct emotional/affective, cognitive/deliberative, and social modules. Grounded in contemporary neuroscience, these internal components interact to generate observed, often far-from-rational, individual behavior. When multiple agents of this new type move and interact spatially, they collectively generate an astonishing range of dynamics spanning the fields of social conflict, psychology, public health, law, network science, and economics.

Epstein weaves a computational tapestry with threads from Plato, Hume, Darwin, Pavlov, Smith, Tolstoy, Marx, James, and Dostoevsky, among others. This transformative synthesis of social philosophy, cognitive neuroscience, and agent-based modeling will fascinate scholars and students of every stripe. Epstein's computer programs are provided in the book or on its Princeton University Press website, along with movies of his "computational parables."

Agent_Zero is a signal departure in what it includes (e.g., a new synthesis of neurally grounded internal modules), what it eschews (e.g., standard behavioral imitation), the phenomena it generates (from genocide to financial panic), and the modeling arsenal it offers the scientific community.

For generative social science, *Agent_Zero* presents a groundbreaking vision and the tools to realize it.

From reader reviews:

Adria Jenkins:

Book is written, printed, or highlighted for everything. You can understand everything you want by a e-book. Book has a different type. To be sure that book is important factor to bring us around the world. Beside that you can your reading expertise was fluently. A guide Agent_Zero: Toward Neurocognitive Foundations for Generative Social Science (Princeton Studies in Complexity) will make you to become smarter. You can feel far more confidence if you can know about almost everything. But some of you think that will open or reading a book make you bored. It is far from make you fun. Why they are often thought like that? Have you seeking best book or suited book with you?

Guillermo Behler:

The reason why? Because this Agent_Zero: Toward Neurocognitive Foundations for Generative Social Science (Princeton Studies in Complexity) is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will distress you with the secret the idea inside. Reading this book alongside it was fantastic author who also write the book in such remarkable way makes the content on the inside easier to understand, entertaining means but still convey the meaning totally. So , it is good for you because of not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of advantages than the other book possess such as help improving your ability and your critical thinking approach. So , still want to hold up having that book? If I have been you I will go to the publication store hurriedly.

Brian Paige:

Reading can called brain hangout, why? Because when you find yourself reading a book specifically book entitled Agent_Zero: Toward Neurocognitive Foundations for Generative Social Science (Princeton Studies in Complexity) the mind will drift away trough every dimension, wandering in each and every aspect that maybe mysterious for but surely will become your mind friends. Imaging each and every word written in a e-book then become one web form conclusion and explanation that maybe you never get just before. The Agent_Zero: Toward Neurocognitive Foundations for Generative Social Science (Princeton Studies in Complexity) giving you one more experience more than blown away the mind but also giving you useful details for your better life in this particular era. So now let us show you the relaxing pattern the following is your body and mind are going to be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary paying spare time activity?

Robert Carroll:

In this era which is the greater man or who has ability to do something more are more precious than other. Do you want to become considered one of it? It is just simple way to have that. What you are related is just spending your time not very much but quite enough to have a look at some books. One of several books in

the top list in your reading list is usually *Agent_Zero: Toward Neurocognitive Foundations for Generative Social Science* (Princeton Studies in Complexity). This book which can be qualified as *The Hungry Inclines* can get you closer in turning out to be precious person. By looking right up and review this reserve you can get many advantages.
