Hurricane- and coastal-storm-related losses have increased substantially during the past century, largely due to increases in population and development in the most susceptible coastal areas. Climate change poses additional threats to coastal communities from sea level rise and possible increases in strength of the largest hurricanes. Several large cities in the United States have extensive assets at risk to coastal storms, along with countless smaller cities and developed areas. The devastation from Superstorm Sandy has heightened the nation's awareness of these vulnerabilities. What can we do to better prepare for and respond to the increasing risks of loss?

*Reducing Coastal Risk on the East and Gulf Coasts* reviews the coastal risk-reduction strategies and levels of protection that have been used along the United States East and Gulf Coasts to reduce the impacts of coastal flooding associated with storm surges. This report evaluates their effectiveness in terms of economic return, protection of life safety, and minimization of environmental effects. According to this report, the vast majority of the funding for coastal risk-related issues is provided only after a disaster occurs. This report calls for the development of a national vision for coastal risk management that includes a long-term view, regional solutions, and recognition of the full array of economic, social, environmental, and life-safety benefits that come from risk reduction efforts. To support this vision, *Reducing Coastal Risk* states that a national coastal risk assessment is needed to identify those areas with the greatest risks that are high priorities for risk reduction efforts. The report discusses the implications of expanding the extent and levels of coastal storm surge protection in terms of operation and maintenance costs and the availability of resources.

*Reducing Coastal Risk* recommends that benefit-cost analysis, constrained by acceptable risk criteria and other important environmental and social factors, be used as a framework for evaluating national investments in coastal risk reduction. The recommendations of this report will assist engineers, planners and policy makers at national, regional, state, and local levels to move from a nation that is primarily reactive to coastal disasters to one that invests wisely in coastal risk reduction and builds resilience among coastal communities.

**From reader reviews:**

**Sandra Murray:**

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to be aware of everything in the world. Each book has different aim or maybe goal; it means that reserve has different type. Some people sense enjoy to spend their time to read a book. They are really reading whatever they have because their hobby is definitely reading a book. Consider the person who don't like looking at a book? Sometime, man or woman feel need book once they found difficult problem as well as exercise. Well, probably you will need this Reducing Coastal Risk on the East and Gulf Coasts.

**Georgia Lopez:**

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you just dont know the inside because don't assess book by its include may doesn't work this is difficult job because you are frightened that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer can be Reducing Coastal Risk on the East and Gulf Coasts why because the fantastic cover that make you consider concerning the content will not disappoint a person. The inside or content is usually fantastic as the outside or maybe cover. Your reading sixth sense will directly make suggestions to pick up this book.

**Albert Parks:**

This Reducing Coastal Risk on the East and Gulf Coasts is completely new way for you who has curiosity to look for some information mainly because it relief your hunger details. Getting deeper you upon it getting knowledge more you know or you who still having little bit of digest in reading this Reducing Coastal Risk on the East and Gulf Coasts can be the light food for yourself because the information inside this particular book is easy to get through anyone. These books acquire itself in the form that is certainly reachable by anyone, yeah I mean in the e-book application form. People who think that in reserve form make them feel drowsy even dizzy this e-book is the answer. So you cannot find any in reading a publication especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss that! Just read this e-book variety for your better life along with knowledge.

**Kristi Jones:**

As we know that book is vital thing to add our information for everything. By a guide we can know everything we really wish for. A book is a group of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This guide Reducing Coastal Risk on the East and Gulf Coasts was filled about science. Spend your extra time to add your knowledge about your research competence. Some people has various feel when they reading some sort of book. If you know how big good thing about a book, you

can feel enjoy to read a publication. In the modern era like now, many ways to get book which you wanted.
