**Raspberry Pi with Java: Programming the Internet of Things (IoT)** Stephen Chin, James Weaver

**Use Raspberry Pi with Java to create innovative devices that power the internet of things!**

*Raspberry Pi with Java: Programming the Internet of Things (IoT)* fills an important gap in knowledge between seasoned Java developers and embedded-hardware gurus, taking a project-based approach to skills development from which both hobbyists and professionals can learn. By starting with simple projects based on open-source libraries such as Pi4J, hobbyists can get immediate results without a significant investment in time or hardware.

Later projects target simplified industrial use cases where professionals can start to apply their skills to practical problems in the fields of home automation, healthcare, and robotics. This progression prepares you to be an active participant in the IoT revolution that is reshaping our lives.

For the hobbyist:

- Hardware used in projects is affordable and easily accessible
- Follows a project-based learning approach with a gradual learning curve
- Projects are based on open-source code repositories with commercial friendly licenses

For the professional computer engineer:

- Uses an industry-standard platform that allows for high performance, secure, production-ready applications
- Introduces Java SE Embedded for large devices and Java ME Embedded for small devices
- Code is portable to a wide variety of ARM and MIPS based platforms
- Provides practical skill development with advanced projects in the fields of home automation, healthcare, and robotics

**From reader reviews:**

**Charles Powers:**

Book is actually written, printed, or created for everything. You can recognize everything you want by a book. Book has a different type. As we know that book is important thing to bring us around the world. Close to that you can your reading talent was fluently. A publication Raspberry Pi with Java: Programming the Internet of Things (IoT) will make you to end up being smarter. You can feel much more confidence if you can know about every little thing. But some of you think in which open or reading a book make you bored. It is not make you fun. Why they are often thought like that? Have you trying to find best book or suited book with you?

**Michael Yancey:**

Reading can called thoughts hangout, why? Because when you find yourself reading a book specifically book entitled Raspberry Pi with Java: Programming the Internet of Things (IoT) your head will drift away trough every dimension, wandering in each and every aspect that maybe not known for but surely can become your mind friends. Imaging each word written in a publication then become one web form conclusion and explanation that will maybe you never get previous to. The Raspberry Pi with Java: Programming the Internet of Things (IoT) giving you another experience more than blown away your brain but also giving you useful information for your better life within this era. So now let us teach you the relaxing pattern the following is your body and mind is going to be pleased when you are finished examining it, like winning a. Do you want to try this extraordinary spending spare time activity?

**Stella Neal:**

Within this era which is the greater particular person or who has ability in doing something more are more special than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you should do is just spending your time not very much but quite enough to get a look at some books. Among the books in the top collection in your reading list will be Raspberry Pi with Java: Programming the Internet of Things (IoT). This book that is certainly qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking upwards and review this book you can get many advantages.

**Donald Goodman:**

What is your hobby? Have you heard which question when you got scholars? We believe that that issue was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. So you know that little person similar to reading or as looking at become their hobby. You have to know that reading is very important along with book as to be the issue. Book is important thing to add you knowledge, except your personal teacher or lecturer. You find good news or update regarding something by book. A substantial number of sorts of books that can you go onto be your object. One of them is niagra Raspberry Pi with Java: Programming the Internet of Things (IoT).
