Experienced instructor David Powers shows you how to build modern, standards-compliant websites using Dreamweaver CS6. David starts with a quick overview of what Dreamweaver is used for, then goes into the nuts and bolts of HTML: the language that governs the appearance of web pages, and how web pages are assembled and connected to create an entire web site. He shows you how to add text to a page, then to add images and hyperlinks.

To add visual sophistication to the design, David introduces Cascading Style Sheets (CSS) and shows how to add special effects to objects, like rounded corners and drop shadows. Further topics include multimedia (video, audio, and Flash), tables, forms, and managing large sites with many pages. Finally, David shows how to use Media Queries to make your site look good on any screen, from a desktop to a tiny mobile device.
