Clinical Chemistry: Diagnostic Standards of Care

James H., PhD Nichols, Carol A., MD, PhD Rauch

Clinical Chemistry: Diagnostic Standards of Care James H., PhD Nichols, Carol A., MD, PhD Rauch

As with other volumes in the *Diagnostic Standards of Care* series, *Clinical Chemistry* focuses specifically on understanding potential problems and sources of error in management of the clinical chemistry testing procedures, how to anticipate and avoid such problems, and how to manage them if they occur. The discussions are concise, practical, specific, and problem-based so the book directly addresses the situations and issues faced by the clinical pathologist or other manager or staff member of the chemistry team. Discussion of each problem is augmented by a case discussion giving a real-world example of how the issue can occur and how it can be effectively dealt with by the manager. The goal is to support the pathologist, manager or technologist in providing the highest possible quality of care and effective, timely consultation to the clinical staff.

***Clinical Chemistry: Diagnostic Standards of Care* features:**

- Comprehensive coverage of key issues in achieving quality in all areas of clinical chemistry
- Includes chapters dedicated to point of care testing, pediatric testing, laboratory information systems and EHR integration, and outreach testing
- Numerous case examples and discussions give real-world illustrations of how problems occur and how to avoid them
- Coverage includes perspectives from the lab manager's and administrator's view
- An emphasis on identifying established, evidence-based standards in clinical chemistry
- Examples of errors which compromise patient safety across all major areas of clinical chemistry
- Pocket-sized for portability
