How to Build a Cheap and Simple Arm Extension that Makes Hand Puppetry Easy and Fun! is a 30-page book that includes many detailed photos and clear, step-by-step instructions on how to build your own arm extension. It only takes a few inexpensive, easy-to-find parts. Whatever you might not already have in the garage you can find at the local hardware store. It uses ½-inch EMT aluminum tubing, three pulleys, a turnbuckle, a couple key rings, some fishing line, one or two rubber bands, a hinge and some miscellaneous hardware. No specialized tools are required, either. The arm extension is designed to work with the puppets you already have! The 4-inch hinged jaw fits inside the puppet where the thumb and fingers usually go. The basic idea is that the puppeteer manipulating the lever from below is able to open and close the mouth of the puppet above. The arm extension described in this book helps make working with puppets easy and fun again! More details can be found at the Open Wide Puppets website.
