Japan: The 2011 Earthquake The New York Times

This selection of New York Times articles traces the story of the devastating earthquake and tsunami that struck Japan on March 11, 2011. These combined events ravaged the country's northeastern coast, killed almost 20,000 people and caused a huge nuclear radiation leak at the Fukushima Daiichi nuclear power plant. In the aftermath, 500,000 people were estimated to be taking comfort or treatment in shelters, and the nuclear disaster was put on a par with that of the Chernobyl accident. Japan has engaged in a massive recovery and reconstruction effort, though many communities are still contending with the effect of the calamity and new nuclear leaks have been reported in 2013.
